27. Description of Change: (use additional Sheets as necessary)  Prior to installation of Drop 4P1, the DDIST database space needs to be allocated on the Ingest RAID device at each site, therefore space allocations in RAID are required. Also, in preparation for 4Plandsat Drop (in the future), space needs to also be allocated on Ingest RAID for Storage Management database to move from its current location to Ingest RAID. The space allocation sizing is sufficient for the installation of three modes for each database.											
28. Proposed Solution: (use additional sheets if necessary) The attached RAID partition diagrams indicate the space allocations necessary to house the DDIST and Storage Mgmt databases on the INGEST RAID.											
29. Alternate Solution: (use additional sheets if necessary)											
30. Consequences if Change(s) are not approved: (use additional sheets if necessary) Drop 4p1 will not install DDIST database properly. Drop 4Plandsat will not install Storage Mgmt Database in proper location
